

EXOCUTOR

EXOCUTOR

The Exocutor brand has been a favourite with specifiers for over 20 years, selected for its longstanding reliability and proven efficacy in demanding commercial environments.

Available in 18W, 30W, 36W or 72W units in a stainless steel or white finish, the contemporary design ensures that they are easily identified as high quality Insect-O-Cutor branded products, whilst the carefully crafted, innovative product features deliver superior efficacy against traditional flykillers.

The Exocutor range is full of features designed to maximise useful UV light output, from the internal aluminium UV light reflectors, designed to re-use the powerful insect attracting wavelength of the Philips actinic tubes, to the unique light scoops which allow light to exude from the corners of the unit as well as the front, back and sides. Staggered tube positioning ensures that the maximum amount of UV light is radiated from all areas of the unit, luring flying insects into the highly effective triangular killing grid.

The light scoops give increased light output over traditional products
